

Math Honor Society

Are you interested in joining the Math Honor Society????

The Math Honor Society is open to students who are currently in Algebra II or a higher level math class. Your final grades in all previous high school math classes must be a 3.8 or above to be eligible. We do not consider quarter grades.

While we are an honor society, we are also a service society. Each member must agree to participate in either tutoring or other pre-approved activities (such as math field trips, attend seminars, ushering at math symposiums, etc) 2 times each quarter. Tutoring is in an assigned location, to pre-identified students during LEARN, Monday after school or at Saturday School.

The application fee is \$10 for all new members.
